Experience

Software Engineering Intern   Milpitas, CA   June-August 2015
Flex
- Created a script to automate the hard drive benchmarking process.
- Proposed an email backup protocol for my division.

Mobile App Android Developer Intern   San Francisco, CA   June-August 2014
Macys.com
- Coordinated with marketing and engineering interns to develop and propose a Macy's App extension.
- Successfully interested company founder, Kent Anderson, with some of our ideas.

Projects : matthewantosiak.com

Global Timezones
- A warm up webpage that displays a table of places with their updated corresponding times.
- Obtains a list of places using the moment library and displays a table.

Dog Breed Finder
- A webpage that finds the user's idea dog breed.
- Each dog and their information is queried from dogtime.com using python and the BeautifulSoup library, and stored into a JSON file.

Popular Travel Locations Tech Demo
- Used to determine the popularity of locations around the world at certain times of the year and the most popular areas to visit using heatmaps.
- Uses the flickr api to construct a JSON file system of photo locations.
- Uses the Google maps api to display the photo locations from the JSON files.
